

RACKING SYSTEMS

S. W. Betz Company provides complete turnkey racking systems. From consulting with you and your team to recommend the right system, to procuring the materials, to installation, S. W. Betz provides a single point of contact to work with throughout the entire project. S. W. Betz also helps customers with warehouse layout and design and can provide a design that best utilizes and maximizes your storage capability. Below, find some of the systems that S. W. Betz has helped customers with since the inception of the company in 1933.

Push-Back Pallet Rack

Push-Back Pallet Rack is an ideal way to increase pallet count while offering more pick options than traditional high-density storage systems.

Drive-In Pallet Rack

Drive-In Pallet Rack is a first in last out (FILO) system and is used for maximum space utilization. This type of rack is also best used with a large quantity of few SKU's that are not time critical which helps best utilize space.

Gravity Flow Pallet Rack

Gravity Flow Pallet Rack is a first in first out (FIFO) storage system. Gravity flow rack helps maximize storage space by minimizing aisles.

Carton Flow Storage Rack

Carton Flow Storage Rack is designed for high volume order picking. Industries that carton flow racking is used in include manufacturing, medical, food and beverage, automotive, distribution, and others.

Cantilever Rack Systems

Cantilever rack is typically used when storing longer materials such as lumber. It allows for faster loading and unloading times than regular pallet rack.

Your racking system is one of the most important aspects of your facility, and the right system can help you take advantage of every available foot of space in your warehouse. If you already have a design for your warehouse and know what materials you need, the S. W. Betz Company can acquire and install the materials for you. If you need a design for your warehouse, we can supply a design for you that will help to best utilize your available space.

S. W. Betz Company is a material handling distributor located in Baltimore, MD and has been serving companies in the Mid-Atlantic region since its inception since 1933.

As of July 1, 2015, S. W. Betz has merged with Advance Scale, a leader in the scale industry. Located in Lindenwold, New Jersey, Advance Scale specializes in installing and servicing scales of all capacities. Together, S.W. Betz and Advance will continue to identify solutions that meet the unique needs of their customers, deliver exceptional value and provide excellent customer service.

Contact us with your unique needs and let one of our experienced weighing and material handling sales representatives develop a customized solution geared towards your specific needs.
